# CEO's Desk

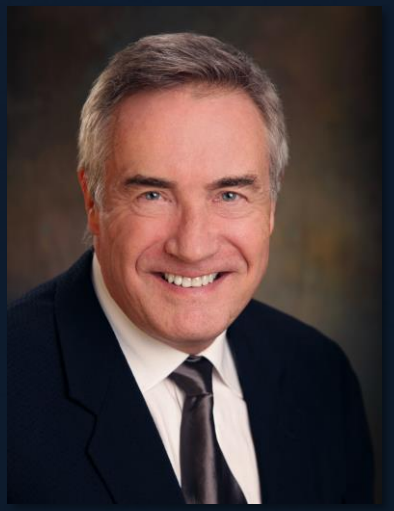
## State of the Market 2024

**Presented By**

**Bruce Milne**

Chief Executive Officer

Corum Group Ltd.



CORUM
MERGERS & ACQUISITIONS

# Despite two wars, 2024 Tech M&A outlook is strong.

CORUM
MERGERS & ACQUISITIONS

# There are a record number of buyers putting capital to use before inflation erodes it.

CORUM
MERGERS & ACQUISITIONS

# The Age of the "Bolt-on"

- "Bolt-ons" are the bulk of the transactions.
- New funds are emerging everyday.
- We're seeing an uptick in recapitalizations.

CORUM
MERGERS & ACQUISITIONS

# Are you part of a disruptive tech trend?

Elevated deal volume will continue in 2024 for companies part of a disruptive tech trend.

HEALTHTECH CONTINUUM

REGTECH SYSTEMS

BLUE COLLAR SOFTWARE

DIGITAL BUILT ENVIRONMENT

## Functional

# 2024 Top 10 Disruptive Technology Trends

CORUM MERGERS & ACQUISITIONS

## #1: GenAI Enablement

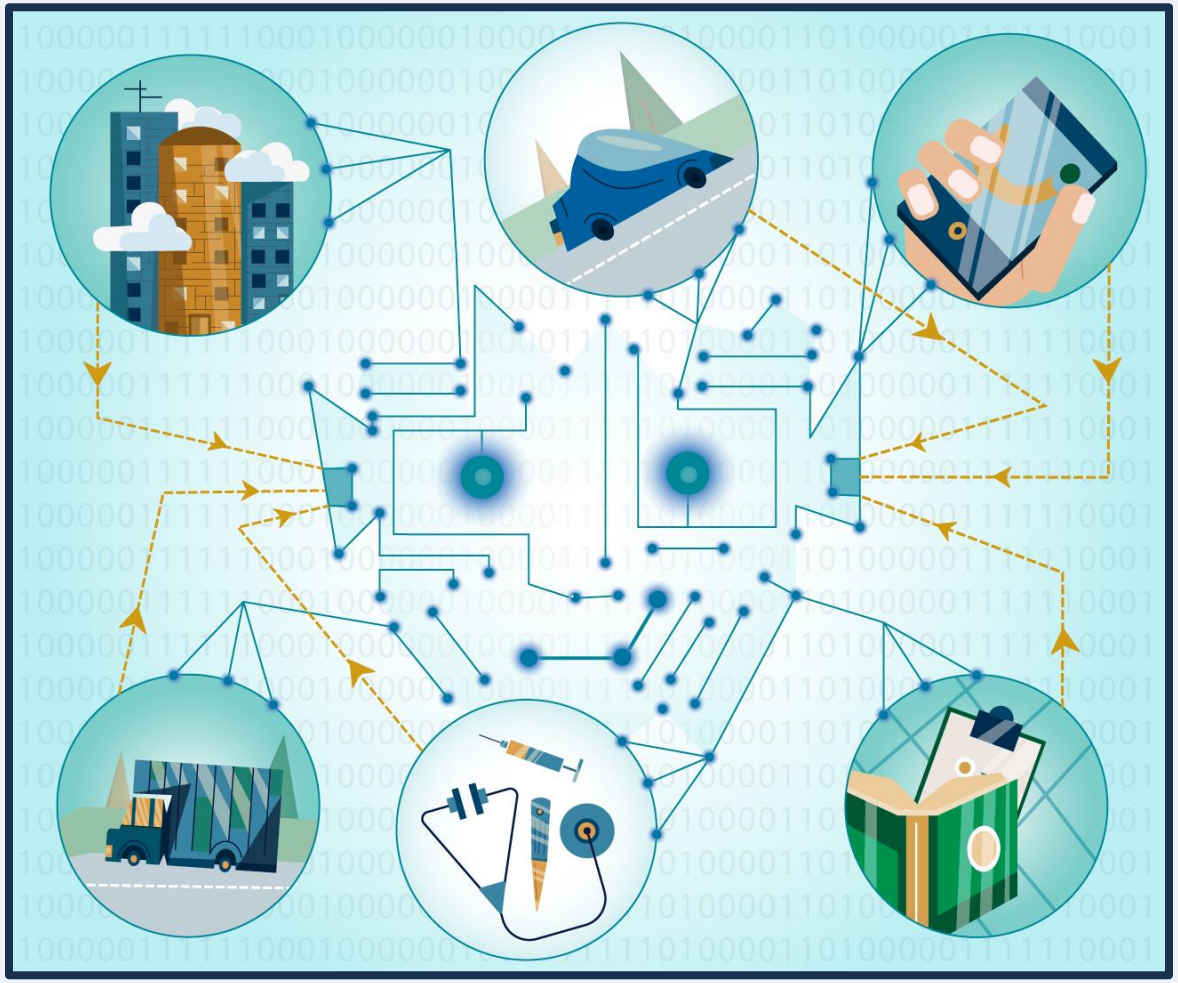
Cutting edge tech with real-world applications and infrastructural needs

### INDUSTRY DRIVERS

- Launch of ChatGPT began a frenzy of activity by investors, entrepreneurs and most importantly – customers
- Customer demand has translated into buyer demand
- High computing requirements create another area of need
- New ecosystem of AI infrastructure companies emerging addressing orchestration, compliance, QA and more
- Given huge interest & activity, M&A window may be limited

### CREATING M&A VALUE FOR

- Companies using GenAI in innovative ways to analyze data and generate novel content in B2B contexts
- Advanced LLMs and tools for their development, management and improvement
- Solutions addressing compute scarcity—HPC analytics, power management, edge computing, etc.
- Solutions filling emerging GenAI ecosystem gaps



# 2024 Top 10 Disruptive Technology Trends

CORUM
MERGERS & ACQUISITIONS

## #2: People-Centric Productivity

Enabling increased efficiency from an empowered workforce

### INDUSTRY DRIVERS

- Employment patterns have changed at a fundamental level
- Rather than put out of work by AI & automation, employees wield them as tools and are more valuable than ever
- Changes in work environments drive more dependence on technology for collaboration, onboarding, training etc.
- Retirement waves creating dramatic knowledge gaps
- Mobility puts technology in the hands of every worker

### CREATING M&A VALUE FOR

- Human resources technology across analytics, workforce management, recruitment, etc.
- Employee experience technology and expertise that creates demonstrable improvements in retention, satisfaction, etc.
- Hybrid AI, automation, Robotic Process Automation, and other engines of worker efficiency, especially desk less workers
- Tools that enable low and medium experienced workers to accomplish tasks traditionally requiring deep expertise

# 2024 Top 10 Disruptive Technology Trends

CORUM
MERGERS & ACQUISITIONS

## #3: Actionable Analytics

BI, AI & data science driving better business decisions

### INDUSTRY DRIVERS

- Value of analytics tools is in prescriptive insights & business rules, less so descriptive visualization & dashboards
- Increasing amounts of data provide more powerful predictive power but require more robust infrastructure
- Applications and industries with “small data” still require decision support & robust BI

### CREATING M&A VALUE FOR

- Predictive analytics technology and expertise tailored for underserved markets, platforms and infrastructure
- Powerful or unique data resources
- Data Science Monetization tools & teams
- Market-specific decision support technology
- Data management tools & infrastructure

# 2024 Top 10 Disruptive Technology Trends

CORUM MERGERS & ACQUISITIONS

## #4 CashflowTech

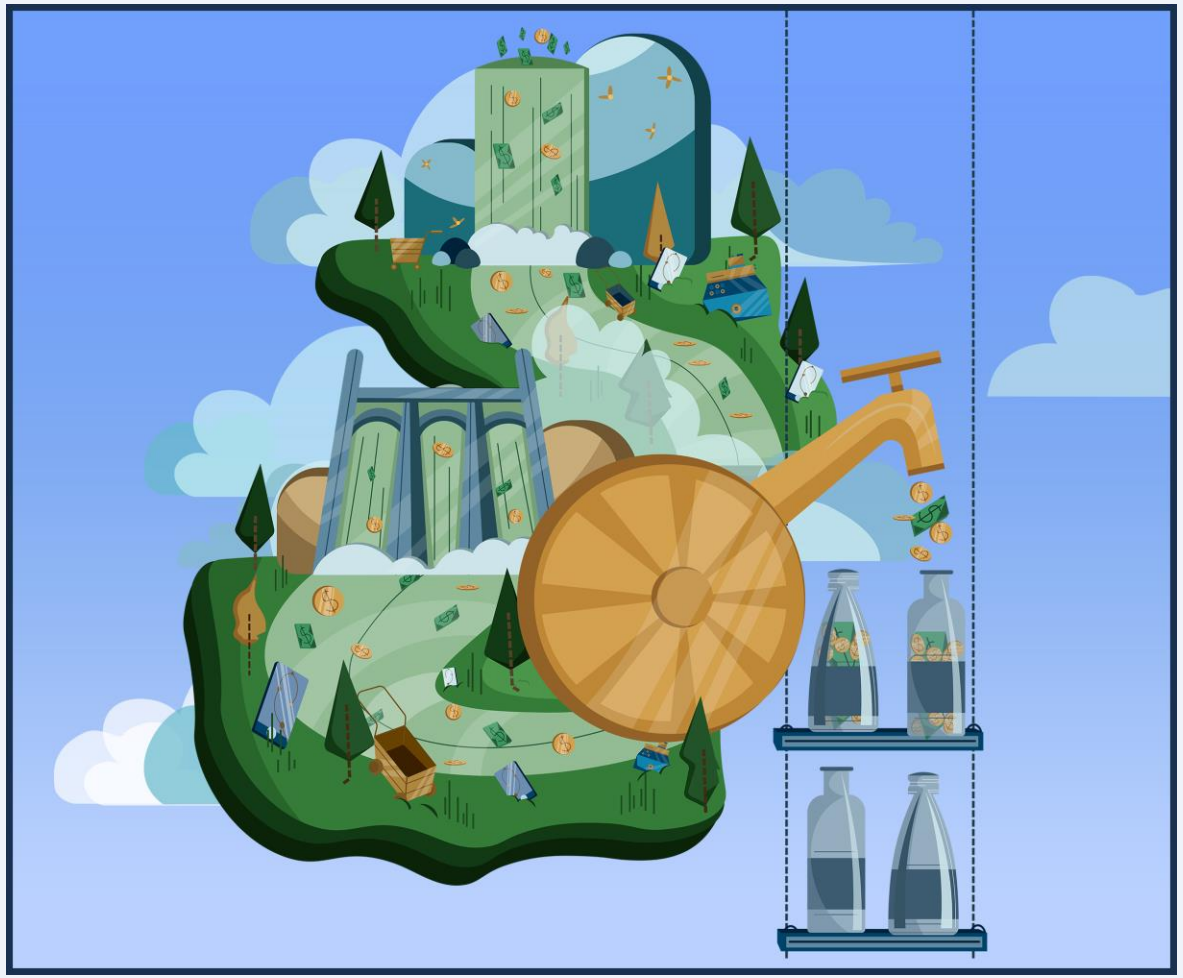
Software and embedded fintech built around the movement of money

### INDUSTRY DRIVERS

- Enabling the getting and keeping of revenue may be the best single way to ensure strong customer relationships
- “Office of the CFO” emerging as a high-value area of focus
- Credit card payment enablement remains a core M&A thesis
- Many buyers gaining comfort with “re-occurring” transactional revenues in other areas
- Transactional datastreams becoming fundamental

### CREATING M&A VALUE FOR

- Innovative fintech components embedded in B2B software
- Billing & invoicing SaaS
- Expense management, procurement, pricing, inventory management and other cash-optimization technologies
- Vertical market ERPs with captive but unrealized payment volume - both data and revenue opportunities



# 2024 Top 10 Disruptive Technology Trends

CORUM MERGERS & ACQUISITIONS

## #5: EverythingOps

Operationalizing data across industries from definition through delivery

### INDUSTRY DRIVERS

- DevOps evolving to more tightly integrate with broader business goals & strategy—"BizDevOps"—and beyond
- Continuous delivery principles intersect with acquirer appetite for long-term "sticky" customer relationships
- Many initial DevOps implementations plagued by fragmented toolchains and brittle, non-automated systems
- Tools needed to capture and share data across silos

### CREATING M&A VALUE FOR

- All the "Ops": DevOps, MLOps, SecOps, SalesOps, etc.
- Vertically focused platforms that own the end-to-end business value stream from problem definition to delivery
- Performance monitoring & management—measurement and metrics across the pipeline and departments
- Lightweight point solutions that can be easily folded into Enterprise Service Management platforms

# 2024 Top 10 Disruptive Technology Trends

CORUM MERGERS & ACQUISITIONS

## #6: Focused Managed Services

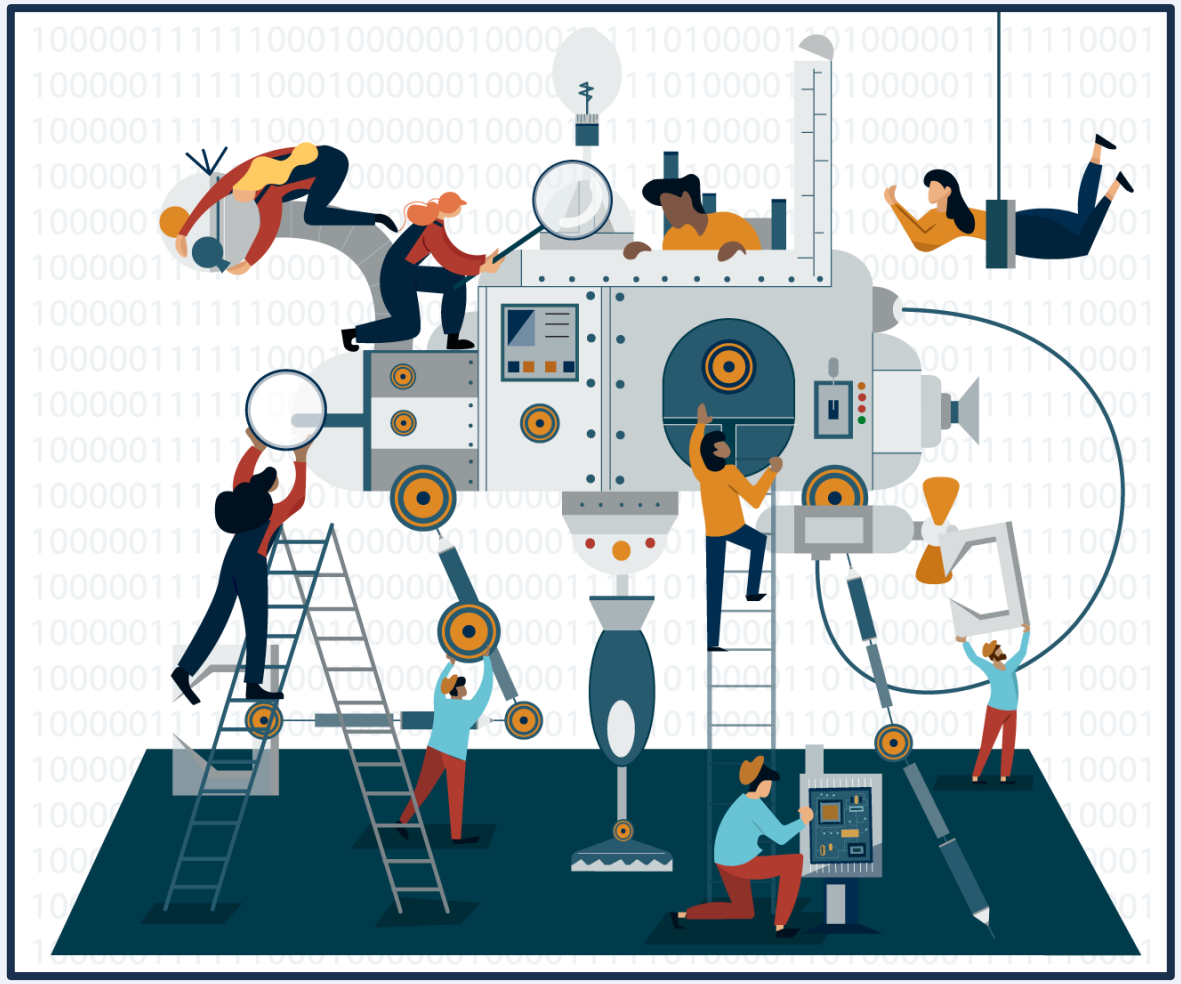
Predictable revenues from targeted value creation

### INDUSTRY DRIVERS

- Increasingly complex technologies require increasingly specialized expertise – both individuals & corporations
- "Low hanging fruit" being picked by tech, not services—Cloud, AI, low-code, etc., driving services deep, not wide
- Recurring revenue models are ascendant as buyers seek to apply the lessons of SaaS to grow services companies
- Increased comfort with blended offshore/onshore teams

### CREATING M&A VALUE FOR

- Managed services firms specializing in less crowded ecosystems: ServiceNow, Atlassian, Snowflake, Qlik, etc.
- Focused services around key trends, especially Cloud, AI, Industrial IoT, Actionable Analytics & cybersecurity
- Cloud migration & implementation capabilities within vertical markets, both niche and broad
- Long-term services contracts that functionally behave like recurring revenue



# 2024 Top 10 Disruptive Technology Trends

CORUM MERGERS & ACQUISITIONS

## #7: Healthtech Continuum

Connective tech coordinating systems, care & patient data

### INDUSTRY DRIVERS

- Increased focus on patient populations and data before (preventative) and after (post-acute) treatment
- Care moving closer to the patient, wherever they are both physically and on the broader “continuum of care”
- Growing worldwide shortage of caregivers and specialists while the population keeps getting older

### CREATING M&A VALUE FOR

- SaaS offerings outside standard settings, such as labs, urgent care, PT, behavioral health, eldercare, etc.
- Healthtech leveraging predictive analytics & AI
- Intelligent systems for patient data collection, monitoring and predictive intervention
- Tech improving clinical trial speed & compliance at scale
- Innovative, FDA-approved medtech with a path to payment

# 2024 Top 10 Disruptive Technology Trends

CORUM
MERGERS & ACQUISITIONS

## #8: Regtech Systems

Addressing complex social, safety & security problems with technology

### INDUSTRY DRIVERS

- Acquiregulatory complexity coupled with accelerating change requires deeper regtech capability
- Technological capabilities Improv & driving increased regulations
- Environmental, Social & Governance (ESG) requirements the latest, following HIPAA, GDPR, EHS, KYC and others
- Accelerating digitization of state and local governments

### CREATING M&A VALUE FOR

- Compliance technology functionally or directly mandated by regulation or industry standards
- Climate & other ESG measurement & reporting technologies
- Fintech compliance technology (Anti-fraud, AML, CFT, etc.)
- Track & trace technologies across industries
- SaaS solutions selling into regulators & local governments

# 2024 Top 10 Disruptive Technology Trends

CORUM
MERGERS & ACQUISITIONS

## #9: Blue Collar Software

Every worker is a knowledge worker

### INDUSTRY DRIVERS

- All previous trends converging on and enabling underserved "toolbelt" industries
- Many industries are "leapfrogging" from legacy systems or paper-pencil directly to mobile, cloud, IoT, AI, etc.
- Strong ROI opportunities for measurably enhanced productivity, quality, safety and efficiency
- Discrete markets with smaller TAMs are particularly attractive to many financial acquirers

### CREATING M&A VALUE FOR

- Upstream, midstream & downstream opportunities
- Solutions for end-user workers at the job site or in the field
- Underserved markets including food & agriculture, construction, manufacturing, mining, trucking, etc.
- Narrow niches with low TAM but high retention due to purpose-built software solving specific problems

# 2024 Top 10 Disruptive Technology Trends

CORUM
MERGERS & ACQUISITIONS

## #10: Digital Built Environment

Facilitating the interplay between data and real-world places and things

### INDUSTRY DRIVERS

- Many of these same trends are impacting not just people but facilities and other assets in industrial contexts and beyond
- IoT, digital twins and connectivity have reached maturity to enable more granular monitoring, control and analysis
- Building lifecycle management, “Smart Buildings” and related paradigms becoming more influential

### CREATING M&A VALUE FOR

- BIM (Building Information Modeling) and related solutions
- Software orchestration layers controlling operational assets
- Enterprise Asset Management services and solutions
- Cybersecurity addressing operational technology
- AI-enabled technology leveraging video and other sensors for operational optimization & physical safety/security
